Reply to Community Motion from Christine E..

[Community Motion for Website Accessibility Remediation \(Resubmission\)](#)

9 May 2026

The Board of Directors acknowledges receipt of this resubmission and the accompanying technical accessibility audit. We want to be direct: the prior assurances that the website was in full ADA compliance were inaccurate. The audit Christine has provided demonstrates this clearly, and we are grateful for her persistence in bringing these barriers to our attention.

We recognize that this is not merely a compliance matter. Community members relying on screen readers, keyboard navigation, and assistive technologies should never have faced these barriers when seeking recovery support. We are committed to ensuring our digital presence reflects the values of inclusion and compassion central to our shared practice.

This motion will be referred to the Communications Committee to create the best plan of action. As a board, we will need to discuss funding and will have a response within 60 days. We thank Christine for her dedication to this work and invite her continued collaboration in implementation.
